

NTP expands coverage of Nonneoplastic Lesion Atlas

Several new sections have been added to the National Toxicology Program's Nonneoplastic Lesion Atlas

(<http://ntp.niehs.nih.gov/nnl/index.htm>)

over the last few months. A whole new section on a very important tissue, the kidney,

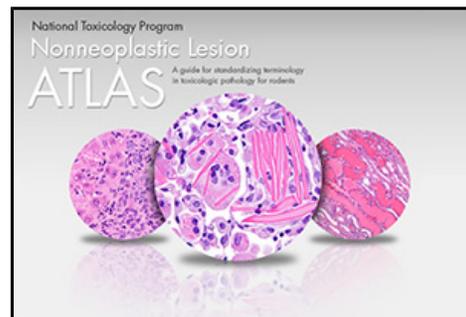

(<http://ntp.niehs.nih.gov/nnl/urinary/kidney/index.htm>)

can now be found under the Urinary System.

(<http://ntp.niehs.nih.gov/nnl/urinary/index.htm>)

Three other new systems have been added with hundreds of high quality images and narrative:

- **Endocrine System**
(<http://ntp.niehs.nih.gov/nnl/endocrine/index.htm>)
- **Male Reproductive System**
(http://ntp.niehs.nih.gov/nnl/male_reproductive/index.htm)
- **Special Senses System**
(http://ntp.niehs.nih.gov/nnl/special_senses/index.htm)
(includes ears and eyes and related glands)

When completed this searchable web-based resource will contain 56 sections covering 13 biological systems.

Look for more detailed information about the Atlas in early 2015, and check the Atlas regularly for updates.

The Environmental Factor is produced monthly by the [National Institute of Environmental Health Sciences \(NIEHS\)](http://www.niehs.nih.gov/)
